WHITE OIL CONCENTRATE

**Equipment**

- 1 cup vegetable oil
- ½ cup dishwashing liquid
- Measuring cups
- Large jar with lid
- Tablespoon measure
- Spray bottle
- Funnel
- 1 litre of water
- Labels
- Pen

**WHAT TO DO:**

Measure 1 cup of vegetable oil and ½ cup of dishwashing liquid and pour into a large jug. Place lid on securely and shake, this is your concentrate. Place a funnel into a spray bottle and add 2 tablespoons of concentrate, then add 1 litre of water. Write on a label with the name, date and dilution rate and stick to the concentrate jar. On another label, write the name “white oil” and put on the spray bottle. The concentrate can then be stored for up to two months.

**FOR THE CONTROL OF:**

Scale, aphids, mites, mealy bug, whitefly and citrus leaf miner.

**CAUTION:**

Do not spray in hot weather as this can burn the plants. Also avoid spraying in windy weather or when rain is expected.
